Document: Release Summary
Product Name: sano
Team Members: Kyle Delmo, Nora Fotoohi, Gianmarco Sassoli, Andy Lau, Elton Su, Alonso Isauro
Release Date: 12.09.2025
Revision Number: 1.0
Revision Date: 12.1.2025

User Stories and Acceptance Criteria

- As a student, I want to be able to create and log into an account to be able to create and view posts.
  - Manual testing of the user being able to successfully log into the app and able to see posts that other users have made.
- As a student with little food/slug points, I want to know who is offering food or slug points.
  - Manual testing if users are able to see posts in a live feed after they are posted.
- As a UCSC student with a lot of food/slug points, I want to create a post letting people know that I am either giving away food or offering slug points.
  - Manual testing of creating posts using both food give away and swipes
- As a student swiping someone in, I want to specify the time, location, and amount I'm willing to spend.
  - Manual testing of all fields in the create post screen, along with testing the x button and the posts button.
- As a UCSC student, I want to let other people know that I am a legitimate UCSC student.
  - Manual testing of UCSC login with supabase. Testing the login with a non UCSC email, checking to make sure it won't let us in. Testing with a UCSC email making sure it will let us in.
- As a receiver, I want to be able to see the ingredients of the food being given away, in case I have an allergy.
  - Manual testing photos uploaded can be viewed by other users.
- As a giver, I want to be able to post the expiration date of the food I'm giving away.
  - Manual testing of photo upload and checking to make sure that all photos uploaded can be viewed by other users.
- As a student giving away food, I want to be able to communicate with the recipient to make sure the recipient is aware and satisfied.
  - Manual testing of a working chat feature along with being able to access chats with different users on the giver's perspective.
- As a student receiving food, I want to be able to ask more questions about the food item and figure out where to pick it up.
  - Manual testing of live chat with the giver when reservation is made on a food item post.
- As a student getting swiped in, I want to be able to clarify and confirm that the details on the post are correct and let the giver know that I am on the way or have arrived.
  - Manual testing of live chat with the giver when a reservation is made for a slug point post.
- As a receiver, I want to be able to see which posts are for certain times that I

am available.
  - ○ Manual testing if users are able to filter the posts based on the time.
- As a receiver, I want to be able to see which posts are in a nearby area, so that I don't have to travel far.
  - ○ Manual testing if users are able to filter the posts based on location
- As a receiver, I want to be able to see which posts are giving away food, and which ones are giving away slug points.
  - ○ Manual testing to make sure that users can filter posts in the feed based on what tags are used.
- As a receiver, I want to be able to easily and quickly reserve a spot in order to receive a swipe.
  - ○ Manual testing of the reservation button and being able to see the reservation button for every post, and users able to unreserve a spot if they wish. More manual testing on if the user can chat with the poster after reserving the posts and the post updating the amount of spots left and spots taken based on how many users reserved the post.
- As a giver, I want a certain amount of people to be able to quickly sign up to receive slug points and swipes from me.
  - ○ Manual testing of the slots field in the form. Ensuring capacity works with different amount of sign ups
- As a giver, I want to be able to easily see the posts that I have made and are active.
  - ○ Manual testing of accessing profile page and viewing, scrolling, and refreshing post feed of your own posts.
- As a user, I want to be able access the separate chats of each post I have created or interacted with.
  - ○ Manual testing of accessing chatrooms for each individual and post
- As a user, I want to be able to know if another user has sent me any messages so that I know which chats need my attention.
  - ○ Manual testing of one user sending another a message and the other user receiving a notification notifying them that they have been messaged by another user.
- As a user, I want to be able to see what ratings other givers/receivers have in order to judge whether they are unreliable or not.
  - ○ Manual testing of viewing and refreshing my own rating on the profile page, and being able to view other user's ratings as well as rating them if they have interacted with my own post.

Known Problems

- **Major Bugs**
  - ○ User cannot click the send button in chat while the keyboard is open
  - ○ Filter does not apply after refreshing home page, but is not cleared

- **Omitted Features**
  - Separate event feed
- **Design Shortcuts**
  - Post reservations, user ratings, and new posts do not update in real time for other logged in users.
  - Notification implementation
  - User is able to rate before the event ends
  - Applicants page does not show the rating of the user
  - Applicants page formatting for the top part is inconsistent.
  - Inconsistent white backgrounds for the top parts of screens.
  - Applicants page does not have a navbar.
  - Only working on IOS

Product Backlog

- Have a section for homemade food.
  - As a giver, I want to be able to give out any homemade food that I have made and have too much of, or wish to give away.
  - As a user, I want to be able to see if there is a post that is giving away homemade food.
- Free-food events home screen.
  - As a receiver, I want to know when and if there is a club or university organization that is setting up a food event where free food will be given out for people.
  - As an organization poster, I want to be able to make a post about a food give-away event on a feed that is separate from the individual posts so that students can see my event's details and information.
- Description for food when is a food give-away type of post.
  - As a receiver, I want to know what kind of food is being given away, especially if it is homemade or an event, so that I can see if there might be any allergens or foods that I cannot eat.
  - As a giver, I want to be able to describe the ingredients used in the food that I am giving away so that other users can see what is in my food.
  - As an organization poster, I want to be able to describe the food that is being given away so that other users will know if they can eat the food.
- Have the ability to bookmark posts.
  - As a receiver, I want to be able to bookmark a post so that I can see if I will be available during the time posted, once I have my schedule for that specific day.

- - As a receiver, I want to be able to bookmark any posts of a certain location or time, so that I will be able to choose the post that is the most convenient for me.
- Create a user page/window that pops up when you hold it (briefly show user ratings).
    - As a user, I don't want to have to navigate to another user's profile in order to see their rating, instead I want to be able to see the user's rating along with their post so that I can weigh my options will all information in front of me.
